Cutting & Polishing Machine

A single machine can perform both the operations i.e. cutting and polishing. The cutting size is limited upto NX core or smaller.

The machine is fixed on a pedestal. A sample holder is provided in which the sample is moved towards the cutting blade. After cutting the faces can be ground or polished to a very fine finish on the diamond impregnated polishing blade.

Technical specifications are as under :-

Dia of blade	: 250/300 mm
Dia. of polishing disc	: 200 mm
Operating HP	: 2
Operated on	: 440 Volts, 3 phase (220 volts Optional)
Water Flow valve	: Provided
RPM of blade	: 2200 (approx.)

OPTIONAL ACCESSORIES

i) Blade

HR72.05.10	250mm diameter
HR72.05.15	300mm diameter

ii) Polishing Disc

HR72.05.50	200mm diameter
